PROFESSIONAL EXPERIENCE

Tier 2 Technical Support Engineer, Full-Stack Developer & QA | *Judge.me Product Reviews* **2021 - Present**

- Promoted to Tier 2 to handle the most complex incidents: bug reproduction, root cause analysis, QA, data investigation and validation of fixes with product and engineering teams.
- Resolved over 10,000 technical tickets across Shopify and other platforms: JavaScript/CSS, APIs, integrations, data, technical SEO, app conflicts and frontend behavior.
- Development and customization with JavaScript, TypeScript, React, Node.js, PHP, Liquid, REST/GraphQL, SQL/MySQL and MongoDB; Shopify expertise, metafields and JSON-LD.
- Hosting webinars and demos, FR/EN documentation and daily collaboration across support, product, engineering and management.

Shopify / E-commerce Developer | *Freelance* | *International Clients* **2022 - Present**

- Design and customization of Shopify stores, third-party integrations, performance, technical SEO, structured data and production bug resolution.

TECHNICAL SKILLS

Frontend	React, Next.js, Angular, Vue.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Liquid
Backend & Data	Node.js, Express, PHP, Python, Java, REST APIs, GraphQL, SQL/MySQL, PostgreSQL, MongoDB
Cloud & DevOps	Docker, Docker Compose, Git, GitHub/GitLab, CI/CD, Vercel, AWS (fundamentals), automation
E-commerce & QA	Shopify, Hydrogen, Storefront API, Admin API, metafields, JSON-LD, technical SEO, QA, RCA, Jira
AI	RAG, LLM assistants, data source integration, research and response workflow design

SELECTED PROJECTS

Atlas - AI Assistant for Energy Data | *RAG, APIs, multi-source data* **2026**

- Prototype of a platform combining electricity consumption, billing and customer information, with an AI assistant able to query multiple sources through a single interface.

Ticket Management Platform | *React, Node.js, Express, PostgreSQL* **2026**

- Web application with authentication, roles, ticket creation and tracking, filters, search and REST API.

Headless Shopify Storefronts | *React, Hydrogen, Sanity, Storefront API* **2022 - Present**

- Headless storefronts with cart/routing logic, CMS content, GraphQL integrations and performance optimization.

E-commerce Dashboard | *Next.js, TypeScript, Node.js, SQL* **2025**

- Dashboard for orders, revenue and products, with data import, charts, filters and backend endpoints.

Carpooling Application | *Master's Final Project* | *Java, Angular, REST, SQL* **2022**

- Full-stack design: REST backend, Angular frontend, SQL data, users, trips, bookings and matching logic.

Shopify Store Health Monitor | *Next.js, Node.js, Shopify Admin API, PostgreSQL, Docker* **2026**

- Shopify OAuth application to audit integrations, metafields, structured data and storefront anomalies.

Shopify Merchant Copilot | *RAG, Shopify Admin API, Node.js, PostgreSQL, Docker* **2026**

- AI assistant connected to Shopify data and documentation to accelerate support and incident diagnosis.

EDUCATION

Master's in Software Architecture and Development - Bac+5 | *Ingetis Paris, France* **2026 - 2027**

Master's in Software Engineering and Web Applications | *Faculty of Sciences and Technology, Settat* **2019 - 2022**

Bachelor in General Engineering | *Yncréa Maroc, Rabat* **2018 - 2019**

Preparatory Program - Mathematics & Physics | *Yncréa Maroc, Rabat* **2016 - 2018**

LANGUAGES

Arabic: Native • French: Fluent / Bilingual • English: Full Professional Proficiency
